Agenda

-  Why Data?
-  Classroom Coaching Log
-  Making Coaching Decisions

Data are not about adding more to your plate. Data are about making sure you have the right things on your plate.

Data Are More Than:

Required
Reporting

A “gotcha” or
punishment

A Data-Decision Making Approach: Some Basic Assumptions

Clear vision is established

Outcomes are identified

Fidelity and outcomes are measured

Data are summarized and used

Data collection AND ANALYSIS is an ongoing process

Organizing For an Effective Problem Solving Conversation

A key to collective problem solving is
to provide a visual context that
allows everyone to follow and
contribute

Newton, J. S., Todd, A. W., Algozzine, K., Horner, R. H., & Algozzine, B. (2009). The Team Initiated Problem Solving (TIPS) Training Manual. Educational and Community Supports, University of Oregon, unpublished training manual.

Pyramid Model Goals

Positive implementation outcomes

- Children improve social/emotional skills
- Teachers work effectively with each child including those with challenging behaviors and/or disabilities
- Program effectively prepares children for Kindergarten
- Program builds responsive relationships with each child and family

The Goal

**Fidelity of implementation
that leads to outcomes for children,
families, providers, and programs.**

JF8

Coaching and Data Decision-Making

Coaching Data can help teams and coaches understand...

- What progress has been made in coaching implementation?
- Whether our infrastructure supports coaching (time allocated and number of coaches)
- What are missing elements that need improvement for supporting practice implementation?

Introduction to the Classroom Coaching Log

Evidence-Based Professional Development

- High Quality Training
- Practice-Based Coaching
 - Collaborative partnership with coachee
 - Focused on a defined set of practices
 - Delivered in complete cycles
 - Shared Goals and Action Plan
 - Focused Observation
 - Reflection and Feedback

Snyder, Hemmeter, & Fox, 2016

Coaching Strategies

What

- Broad and most commonly used strategies
- Both observation and debriefing strategies

Observation Coaching Strategies

- Watch teacher and take detailed notes * (live or video recording)
- Collect data
- Verbal Support
- Side by side gestural support
- Videotape
- Problem solving discussion
- Reflective conversation
- Model target practices
- Assist with environmental arrangements
- Other help in the classroom

Definitions of coaching strategies: https://challengingbehavior.cbcs.usf.edu/docs/coaching_strategies.pdf

Debriefing Strategies

- Help Arrange Environment
- Demonstrate
- Role Play
- Reflection
- Constructive Feedback
- Review Video Tape
- Supportive Feedback
- Set Goals/Action Planning
- Materials Provisions
- Problem-Solving
- Use/Interpret Data
- Individual Child Support

Definitions of coaching strategies: https://challengingbehavior.cbcs.usf.edu/docs/coaching_strategies.pdf

Tips

- ***Discuss support preferences with practitioner BEFORE observing***
- Organize yourself before observation so easy to take notes
- Videotaping allows for the teacher to observe and reflect
- Don't take teacher's focus from children
- Be responsive to teacher's needs

Making Coaching Decisions

Data Decision-Making : It Takes a Team

Leadership

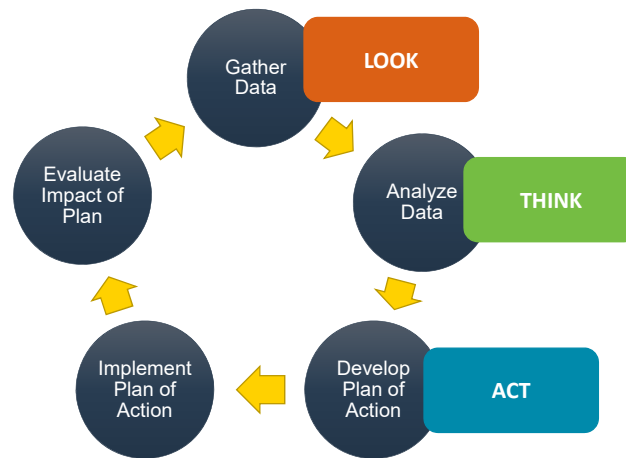

Coach

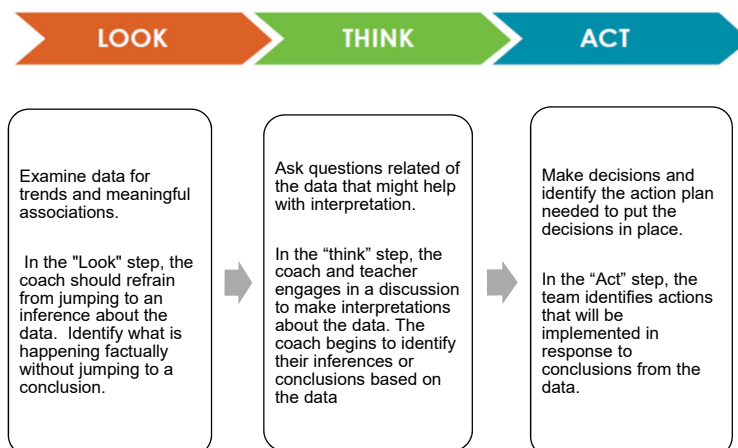

Teacher
Partnership

Data Decision-Making Cycle

Look-Think-Act Process

Data Considerations for LT

Has coaching supports happened the way the leadership team intended?

Were there any major program or coaching changes during the year?

Were there major initiatives that diverted the coaches/teacher's attention and resources from Pyramid Model implementation?

NCPMI

Data Considerations for Coach

Are teachers meeting their goals?

Am I using strategies that are effective for each teacher

Have I used data to adjust strategies so I'm more effective?

Am I making a difference in teacher practices?

NCPMI

Look-Think-Act in Action

Look	Think	Act
<ul style="list-style-type: none"> • Complete coaching cycles • Average duration • Patterns of strategies used • Action plan goals completed (number and percent) 	<ul style="list-style-type: none"> • Were the expected number of cycles and goals completed? • Are there differences across teachers? • Is more time correlated with more goals completed? • Too many or too few goals? 	<ul style="list-style-type: none"> • Identify the reason for too few completed cycles • Consider need for more coaching time • Dig deeper review other data • Provide additional resources for coaches • Review quality of goals

Ms. Rita has been coaching two teachers for approximately 6 months.

Teacher A

- Brand new teacher
- Eager and excited for coaching
- Initial low levels of implementation

Teacher B

- Veteran teacher of 12 years
- Feels reluctant; New to coaching
- Initial high level of implementation

Coach Reflection

Ms. Rita has started to notice that there are differences between Teacher A's and Teacher B's classrooms.

- Teacher A seems to be trying new things in her classroom.
- Teacher B seems to take longer to put new ideas and practices in place.

LOOK at Rita's Coach Log

Attempted Coaching Cycles
Completed Coaching Cycles
Duration

Teacher ID	# of Attempted Cycles	# of Completed Cycles	% Cycles Completed	Total Duration Across Focused Observations	Average Duration Across Focused Observations	Total Debriefing Duration	Average Debriefing Duration
A	11	11	100%	405	36.8	375	34.1
B	9	8	89%	225	25.0	175	21.9

THINK about the data

- Ms. Rita has spent twice as much time with teacher A compared to teacher B.
- Teacher A has more completed coaching cycles.

LOOK at Rita's Coach Log

Patterns of Strategies Across Observation Sessions

Observation Strategy	Teacher ID	
	A	B
% Observed	33%	64%
% Videotaped	6%	0%
% Modeled	11%	0%
% Collected Data	17%	21%
% Verbal Support	8%	0%
% Side by Side Gestural Support	6%	0%
% Problem Solving Discussion	3%	7%
% Reflective Conversation	14%	0%
% Helped w/ Environmental Arrangements	0%	7%
% Other Help in the Classroom	3%	0%
% Other	0%	0%

THINK about the data

- Variety of observation strategies used with Teacher A. Opportunities for in-the-moment coaching and use of video recording.
- Limited range of strategies used with Teacher B. Mainly observation and data collection.

LOOK at Rita's Coach Log

Patterns of Strategies Across Debriefing Sessions

Debriefing Strategy	Teacher ID	
	A	B
% Problem Solving Discussion	9%	10%
% Reflective Conversation	14%	30%
% Helped with environmental arrangements	5%	0%
% Role play	5%	0%
% Constructive feedback	18%	5%
% Goal setting/action planning	14%	15%
% Supportive feedback	25%	35%
% Material provision	2%	5%
% Demonstration	5%	0%
% Individual child support	5%	0%
% Other	0%	0%

THINK about the data

- Providing supportive and constructive feedback to Teacher A.
- Very little use of constructive feedback with Teacher B.
- More variety of reflection and feedback strategies used with Teacher A.

THINK about the data

Are there differences in the collaborative partnerships?

- *Does Rita spend more time coaching Teacher A because that teacher is excited or open to coaching or does she really have an identified need for more coaching support?*
- *Is Rita using more strategies with Teacher A because she is more comfortable interacting with Teacher A?*
- *Is she feeling uncomfortable providing feedback because Teacher B is a veteran teacher?*

LOOK at Rita's Coach Log

Number of Action Plan Goals
Percentage of Action Plan Goals Completed

THINK about the data

- Teacher B started with 3 goals. She has met 3 out of 7 total goals.
- Teacher A started with 2 goals. She has met 4 out of 5 total goals.

Was 3 too many goals for Teacher B to have at once?

Due to initial higher implementation, Teacher B wanted to target all her areas of need at once.

Coaching **ACTIONS**

- Review coaching log data monthly to ensure she's following her plan.
- Use data to determine if changes in coaching make a difference in teacher acquisition of new skills.

Actions: Teacher A

- Continue to provide the same level of coaching support to Teacher A, as it seems to be working.
- Evaluate coaching supports (duration and coaching cycles) once spring TPOT is completed.

Actions: Teacher B

- Spend additional time connecting with Teacher B to build a stronger collaborative partnership.
- Reduce total number of current goals so Teacher B is only working on one or two goals at a time.
- Increase coaching time with Teacher B to see her about once every two weeks.
- Include constructive feedback during reflection and feedback.

Questions

JF12

Pyramid Model Data Roadmap

- Provides guidance on all Pyramid Model tools
- What, When, Who, Why

Using the Roadmap

Practitioner Coaching Log (classroom and early intervention practitioners)

Coaching log data provide a summary of the number and duration of coaching cycles that a practitioner has completed and a description of the professional development strategies used during the coaching cycle. NCPMI coaching log designed for classroom teachers and early intervention practitioners. Observation and defined cycles within a cycle, the average duration of sessions, and the number of action plan goals written and completed. Practitioners can use the summary of coaching data to examine what parts of the coaching cycle were most effective for each practitioner, analyze their use of coaching strategies, and see practitioner progress in achieving action plan goals. In addition, the leadership team can aggregate these data across program coaches to provide a view of the total coaching effort across classrooms or early intervention settings within the program.

On the following pages, we provide data displays that can guide coaches and leadership teams in considering the coaching supports that are provided to individual practitioners and their progress and the program summary data that provides leadership teams with data across all coaches in the program.

Sample Coaching Log Data

This comparison between classroom coaching for two teachers shows differences in the number of attempted coaching cycles, the percent of completed coaching cycles, and the average duration of the coaching cycles with each teacher during observation and pre-intervention.

Sample Charts and Graphs

Tool Description

Coaching log data provide a summary of the number and duration of coaching cycles that a practitioner has completed and a description of the professional development strategies used during the coaching cycle. NCPMI coaching log designed for classroom teachers and early intervention practitioners. Observation and defined cycles within a cycle, the average duration of sessions, and the number of action plan goals written and completed. Practitioners can use the summary of coaching data to examine what parts of the coaching cycle were most effective for each practitioner, analyze their use of coaching strategies, and see practitioner progress in achieving action plan goals. In addition, the leadership team can aggregate these data across program coaches to provide a view of the total coaching effort across classrooms or early intervention settings within the program.

Data Decision-Making

Data decision-making is a foundational element of the Pyramid Model. State leadership teams use data decision-making when examining statewide implementation components and outcomes for local programs, practitioners, and children. Programs use data decision-making to examine their implementation of the Pyramid Model, practitioner implementation of Pyramid Model practices, and outcomes for families and children.

Download the Decision-Making Guide
Roadmap to Effective Intervention Practices: Data Decision-Making and Program-Wide Implementation of the Pyramid Model

Data Decision-Making Tools

These tools and opportunities provide coaches, program leaders, and practitioners with data gathering tools and displays that facilitate data decision-making.

State Leadership Team Tools

- State Leadership Team Benchmarks of Quality
- Program Coaches

Classroom & Program Tools

- Early Childhood Program-Wide PBS Benchmarks of Quality v.2.0
- Teaching Pyramid Observation Tool (TPOT) for Preschool Classrooms
- Teaching Pyramid Infant-Toddler Observation Scale (TPITOS)
- Classroom Coaching Contacts
- Behavior Incident Report System (BIRS)

Early Intervention Program Tools

- Pyramid Model Early Intervention (Part C) Benchmarks of Quality v1.0
- Early Intervention Practitioner Coaching Contacts
- Early Interventionist Pyramid Practices Fidelity Instrument (EIPPI)

Community Leadership Team Tools

- Community-Wide Benchmarks of Quality

Other Data Resources

- Videos & Webinars
- General Resources

COVID-19 Pandemic Emergencies and National Disasters: H
Access resources to support families in helping young children cope with the challenges updated as we obtain more resources.
